

Maintenance of China Tower Communications

AI Overview

China Tower provides comprehensive construction, maintenance, and operation services for telecommunications towers and related infrastructure across China. Overview of China Tower China Tower is the world's largest telecommunications tower infrastructure service provider, managing over 2.094 million tower sites across 31 provinces, municipalities, and autonomous regions in China, serving more than 3.791 million tenants with a tenancy ratio of 1.81 . Established in 2014 through the merger of the tower businesses of China Mobile, China Unicom, and China Telecom, the company is state-owned and listed on the Hong Kong Stock Exchange . Its core strategy, "One Core and Two Wings," focuses on tower infrastructure, information application services, and energy application services such as intelligent battery exchange and power backup . Communication Maintenance Services China Tower's maintenance services cover: Telecommunication tower upkeep: Regular inspections, structural reinforcement, and repairs to ensure operational safety and longevity . Base station ancillary facilities: Maintenance of equipment rooms, power systems, and antenna systems to support uninterrupted network coverage . Public network coverage: Ensuring reliable connectivity in high-speed railways, subways, and large-scale indoor Distributed Antenna Systems (DAS), . Energy and backup solutions: Intelligent battery exchange, power backup, and energy management to maintain continuous operation of communication networks . Industry Partners and Service Providers Several companies collaborate with or provide complementary services to China Tower: Heqin Communications Technology Co.: Offers network design, construction, maintenance, and communication tower solutions for China Tower and other operators, with over 6,000 employees and extensive regional coverage . Qing...
