

Standard Size and Price of In-Home Distribution Box

AI Overview

A typical home distribution box ranges from 6-way to 24-way panels, with prices from \$50 to \$500 depending on capacity, features, and brand. Types and Specifications Distribution boxes, also called consumer units or electrical panels, are the central hub of home wiring, splitting the main power supply into individual circuits for lighting, outlets, and appliances (). Common types include: Main breaker panels: Central point for all circuits, often 100A–200A for modern homes (). Sub-panels: Extensions of the main panel for specific areas or high-demand appliances. Fuse boxes: Older systems using replaceable fuses, mostly replaced by modern breaker panels. Transfer switches: For homes with backup generators, automatically switching power sources (). Key specifications to consider: Number of ways (slots): Determines how many circuit breakers can be installed. Residential boxes typically range from 6-way to 24-way, with larger homes or EV-ready setups requiring more slots (). Amperage rating: Standard home panels are 100A, 150A, or 200A, with higher ratings needed for electric vehicles or smart home systems (). Voltage: Single-phase (most homes) or three-phase (rare in residential, more common in commercial settings) (). Safety features: RCBOs (residual current breakers with overload protection), surge protection devices, and fire-rated enclosures (). Material and IP rating: Indoor panels are usually IP20, while outdoor or weatherproof boxes may be IP44 or higher (). Size and Installation Physical dimensions vary by capacity: Small 6–12 way panels: Approx. 12–18 inches high, 8–12 inches wide. Medium 12–18 way panels: Approx. 18–24 inches high, 12–16 inches wide. Large 24-way panels: 24–36 inches high, 16–20 inches wide (). Installation should allow space for wiring, ventilation, and future expansion. Pre-wired or modular designs si...
