

Two routers at the fiber optic terminal

Overview

Yes, you can connect two routers to one fiber modem, but understanding the 'how' and 'why' is crucial for optimal network performance. This guide clarifies the possibilities, practical methods, and potential pitfalls, ensuring you maximize your home or small office network. Before you begin configuration, it is. Abstract: This article provides a step-by-step guide on how to connect two routers to an incoming fiber optic supply, with the intention of having telephone and broadband services, while also utilizing additional features from the replacement router such as the Fritzbox 7590AX. Bridging two routers on one network isn't as common as it used to be (thanks to mesh Wi-Fi systems), but it can still be an effective way to improve network access in larger. I'm planning to use a TP-Link MC220L transceiver to convert the optical signal to ethernet. This ethernet will then go through a 1 Gbit/s switch, and rout two ethernet cables to each floor.
